The North Carolina Partnership for Children, Inc. Performance-Based Incentive System (PBIS) Preliminary Results

Local Smart Start Partnership Report for:
Smart Start of Forsyth County

Year Ending June 30, 2013 and June 30, 2012

The Performance-Based Incentive System (PBIS) are measures of child well-being for which local Smart Start Partnerships are held accountable. PBIS assesses progress towards realizing Smart Start's mission of advancing a high quality, comprehensive, accountable system of care and education for every child beginning with a healthy birth.

PBIS uses validated data sources from state agencies that directly impact young children (e.g., NC Department of Health and Human Services, Division of Child Development and Early Education, and Division of Public Health). Published annually, data for the PBIS report reflect the entire fiscal year and/or calendar year. The methodology and raw data files for each criterion are available on Smart Net under Program & Evaluation>PBIS.

This report includes 2011-12 and 2012-13 PBIS results for your partnership. In addition, the Base Year Results column has the initial result reported for each criterion. The initial year reported is in parentheses. We encourage you to use this report in a variety of ways to demonstrate your work with young children. For example, you may insert these results into reports you share with your Board, funders, and other community stakeholders.

PBIS Preliminary Results for Forsyth
